

The background of the top half of the image is a detailed, close-up view of a heavy metal vault door. It features a large, circular handle with a radial spoke design, surrounded by numerous bolts and a complex locking mechanism. The lighting is dramatic, highlighting the metallic textures and the intricate engineering of the door.

LMAXTM | Digital

The complete crypto custody solution for institutions

LMAX Digital institutional custody: advantages

- › Designed for institutions and built by the industry leading LMAX Group technology team
- › Security is regularly reviewed and independently verified using advanced techniques (PEN tests, APM, red/blue)
- › HSM are custom designed and physically secured in Tier 4 facilities with 24 hour biometrics and strong perimeter surveillance
- › All crypto currencies are protected by N of M multi-signatures with smart contracts audited by leading external experts
- › Established 24/7 follow the sun operational support and proven custody track record
- › Bespoke insurance available on request for all market participants
- › Regulated by the Gibraltar Financial Services Commission

Vault wallet

The Vault wallet holds the majority of funds at the highest level of security

- › Vault wallet physical security provided by leading global security firm
- › Withdrawals require a visit to the vault to conduct the signing process
- › Separation of duties, requiring multiple teams with technology controls and MFA distributed over a minimum of three sites
- › Keys/HSM distributed over multiple vaults, geographically separated, for security and business continuity/resilience
- › All vault systems fully physically and network isolated, stored in safes inside the vault, with no single person having access
